LEAK DETECTION AND REPAIR (LDAR)
Bureau Veritas Emission Services

INDUSTRY CHALLENGE
There is an ever increasing importance on monitoring air quality impacted by industrial sites, and for businesses to reduce fugitive emissions. With stringent federal and provincial regulatory requirements to ensure that all businesses adhere to established air quality standards, it is imperative to have a trusted partner who has the experience in identifying exact sources of emission—providing a solution that is safe, cost effective, and timely.

LEAK DETECTION AND REPAIR SOLUTION
The Bureau Veritas Leak Detection and Repair (LDAR) program is developed in accordance with all provincial and federal regulations, including AER Directive 060, AER Directive 084, BC Oil & Gas Commission guidelines, and the Regulations Respecting Reduction in the Release of Methane and Certain Volatile Organic Compounds (Upstream Oil and Gas Sector) (SOR/2018-66).

Bureau Veritas provides leak detection and repair services, data management, and staff training. We offer monitoring solutions for emissions of volatile organic compounds (VOCs) and volatile hazardous pollutants (VHAPs) leaking from industrial manufacturing, transportation, and distribution processes. Our team of professional, certified technical experts is able to efficiently identify the exact sources of emissions in a cost effective manner using optical gas imaging and toxic vapor analyzers.

Our services include:

- Leak Detection and Repair (LDAR) programs
- Smart LDAR: OGI, Quantitative OGI, TVA
- Advanced LDAR inventory maintenance
- Fugitive emission monitoring
- Digital P&ID solutions
- Advanced monitoring & sampling solutions
- Database management solutions

THE TRUSTED PROVIDER OF EMISSIONS MONITORING FOR THE OIL AND GAS INDUSTRY

Bureau Veritas’ suite of solutions include ambient air monitoring, source emission monitoring, and leak detection and repair services to help you meet provincial and federal regulatory requirements. From routine air quality analysis to specialized testing and support, we provide customers with the assurance of accurate and defensible data. Our experts have industry experience and adhere to strict regulatory guidelines to ensure customers meet all operating approval requirements.

THE BUREAU VERITAS ADVANTAGE

A Global Reach with a Local Touch

With nearly 200 years of solving industry challenges, Bureau Veritas has an established global network of state-of-the-art laboratories and has a worldwide team of experts to deliver solutions. Leveraging more than 50 years of providing emission solutions in Canada, our local experts continue to deliver safe and reliable fugitive emission inspections, maintenance services, and turn-key LDAR services.

Bureau Veritas is a world leader in laboratory testing, inspection and certification services. Established in 1828, the Group has more than 75,000 employees located in over 1,500 offices and laboratories around the globe. Since our founding, our name has been synonymous with integrity - all the more crucial in an industry built on trust. As a business to business company that has a profound impact on our world (or community), we are dedicated to building trust between client companies, public authorities and consumers.
